PROFESSIONAL SUMMARY

Full Stack Developer with a higher vocational degree in Cross-Platform Application Development (DAM). I design, build and deploy web, mobile and desktop applications, developer tools and multiplayer games. I work with Angular, React, TypeScript, Node.js, Django, Flutter and Unity (C#), with experience in databases (PostgreSQL, MySQL, SQLite), real-time apps with WebRTC, and deployment with Docker and CI/CD. I am looking for a role where I can deliver clean, fast, user-focused software.

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer Present

- Building complete web applications and backend systems, from design to production deployment, plus personal projects: real-time apps, developer tools and games.

Full Stack Developer Intern, SoportTec Mar 2025 - Jul 2025

- Built the Django (Python) backend of a custom visual editor for dynamic invoice templates.
- Templates defined in JSON and Python, with real-time rendering and visual editing.
- Automated export to PDF, JSON and Python; designed the document rendering architecture.

Systems Technician Intern, Huelva City Council Mar 2022 - Jul 2022

- Installed and maintained Linux servers, monitored the network and supported administration tasks with Microsoft Excel.

FEATURED PROJECTS

Chatterly Renewed Angular, Fastify, WebRTC, Electron, Docker

- Real-time chat, calls and tournaments platform with desktop apps; deployed with Docker and GitHub Actions on Oracle Cloud.

Spinly React, TypeScript, Supabase, PostgreSQL

- Online prize wheel deployed on Vercel, with accounts, cloud sync and synthesized sound; Row Level Security on Supabase.

QuizMania TypeScript (no framework), Supabase, PostgreSQL

- Trivia game deployed on Vercel with accounts, friends, rankings and server-side score validation.

MyConversor Angular, Node.js, Express, FFmpeg, Docker

- Web tool to download, trim and convert audio and video, with a library, accounts and a built-in player.

DevStarter TypeScript, VS Code API

- VS Code extension published on the Marketplace and Open VSX to start development projects in one click.

Parkour Beans and NextbotScape Beans (prototypes) Unity, C#, Netcode for GameObjects

- 3D game prototypes (not finished games), one of them online multiplayer, with custom mechanics and interactive environments.

EDUCATION

Higher Vocational Degree in Cross-Platform Application Development (DAM) 2023 - 2025
GPA: 8.83 / 10

Vocational Degree in Telecommunications Installations 2020 - 2022
GPA: 8.1 / 10

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, Angular, React, Astro, Tailwind CSS

Backend: Node.js, Express, Fastify, Django, Python, Java, C#, PHP, Kotlin

Databases: PostgreSQL, MySQL, SQLite, SQL, Supabase

Mobile and Desktop: Flutter, Dart, Android (Kotlin), Electron, Java

Game Development: Unity, C#, multiplayer with Netcode for GameObjects

Tools and DevOps: Git, GitHub Actions, Docker, Linux, WebRTC, Vercel, Odoo
